ABOUT ME

My name is Bruno Quintela, i'm 31 years old and i've been working as frontend developer and UI&UX designer, for the past six years.

Recently my passion with Computer Graphics grew stronger, so as a hobby i decided to focus my developer skills in achieving the best 3D visuals we could get in a browser with the current web technology. In a small time span i was very pleased with the results achieved, so now i'm enthusiastic about it and waiting for new projects where i can push it further.

If you want a website with state of the art visuals and non degradable performance, why don't we work together? Go futher down to see why I am the man you need to hire.

SKILLS OVERVIEW
